International application No. PCT/NL03/00021

- 1.1 From WO-A-93/24 335 a file is known (see on page 5, line 1- page 6, line 13), from which a file according to claim 1 differs in that

(a) the first coupling means comprises clamping means, with which the...arch can be fixed to one of the covers and /or the spine.

A file according to claim 1 is therefore new (Art. 33 (2) PCT).

The problem to be solved is to render easier the production of a file.

None of the documents cited in the Search Report discloses or suggests the feature (a) of claim 1 in order to solve said problem.

A file according to claim 1 involves therefore an inventive step (Art. 33 (3) PCT).

Accordingly also a set according to independent claim 8, a method according to independent claim 9 and the subject-matter of dependent claims 2-7 and 10 are new and involving an inventive step.

2. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document WO-A-93/24 335 is not mentioned in the description, nor is this document identified therein.
- 3.1 Although claim 1 is drafted in the two-part form, known features are incorrectly placed in the characterising portion (see on point 1.) (Rule 6.3(b) PCT).
- 3.2 Independent claims 8 and 9 are not in the two-part form in accordance with Rule 6.3(b) PCT, which in the present case would be appropriate (see on points 1 and 3.1).
